

A · Sweat rate by weather and effort: build option A (left two screens), not B. Current build on the right.

The image displays three mobile app mockups, each representing a different design approach for a hydration settings screen. All mockups share a common header with the 'fred' logo, a 'Settings' title, and a user profile icon 'M'. The 'FUELING' section is visible at the top of each screen.

Mockup A: 3 x 3 grid (recommended)
This mockup features a 'Sweat rate' section with a 'Done' button. It includes a 'Start from' section with four buttons: 'Light', 'Normal' (selected), 'Heavy', and 'Custom'. Below this is a table for 'oz per hour' with three rows (Cold, Mild, Hot) and three columns (Recovery, Steady, Hard). The 'Cold' row has values 14 (auto), 18 (auto), and 20 (yours). The 'Mild' row has 18 (auto), 24 (auto), and 28 (auto). The 'Hot' row has 24 (auto), 34 (yours), and 38 (auto). A note at the bottom explains that blue boxes represent user settings and grey boxes represent auto values. A link 'How to measure it' is also present.

Mockup B: tapping a box
This mockup shows a 'Sweat rate · Hot · Steady' section with a 'Done' button. It features a table with three rows (Cold, Mild, Hot) and three columns (Recovery, Steady, Hard). The 'Cold' row has 14 (auto), 18 (auto), and 20 (yours). The 'Mild' row has 18 (auto), 24 (auto), and 28 (auto). The 'Hot' row has 24 (auto), 34 (yours), and 38 (auto). Below the table, there is a section for 'Hot · Steady' showing 'auto would be 32' and a 'Back to auto' link. A numeric input field with minus and plus buttons is set to 34.

Mockup C: fewer numbers
This mockup shows a 'Sweat rate' section with a 'Done' button. It features a 'Mild weather, by effort' section with three rows: 'Recovery' (18 oz/hr), 'Steady' (24 oz/hr), and 'Hard' (28 oz/hr). Below this is a 'Weather changes it by' section with three rows: 'Cold under 50°F' (-20%), 'Mild 50-75°F' (±0), and 'Hot over 75°F' (+35%). A note at the bottom states: '6 numbers instead of 9. Hot · Steady = 24 × 1.35 = 32 oz/hr.'

NOTES

Started after the hilly long run. Bike OK, no running for now.

Shows on your Volume year. Private to you; never sent to AI.

2 · See it on your year

Volume's year chart shades injury and sick weeks and pins life events, so the dips explain themselves. A list under it; tap to open the note. Year-by-year counts at the bottom.

D · Running phase 1: sport button, menu, Run plan (screens 1–3). "Ride + run" (screen 4) is phase 2: not now.

E · Running look: build A (graphite, violet). Settings: build 9a (switch on top).
