Look and feel: soft minimal

Light background, white panels with thin colored outlines, big light-weight numbers, lots of air. Color is used as a signal, never as a big block. Exactly one tinted panel per page marks the most important thing.

Blue
#179BCC
Steady · bike · fluid · this season

Green
#BECC41
Hard · run · goals · good deltas

Teal
#2ABCBB
Recovery · swim · all-time · check-in

Black
#0D0D0D
Primary buttons · "On the ride"

Red
#EA233A
Warnings and "worse" deltas only

Page

Tints (the one important panel per page)

Blue tint

rgba(23,155,204,.09) · 1.5px #179BCC outline

Green tint

rgba(190,204,65,.14) · 1.5px #BECC41 outline

Teal tint

rgba(42,188,187,.10) · 1.5px #2ABCBB outline

Grey tint

rgba(142,142,147,.08) · 1.5px #D2D2D7 outline

Text colors (must pass WCAG AA)

- **#0D0D0D** primary text and numbers.
- **#3A3A3C** body text in panels ("ink").
- **#6E6E73** ALL secondary text and labels. The renders show a lighter #8E8E93: that fails AA for small text, so use #6E6E73 in code.
- **#8E8E93 / #B5B5BA** only for icons, inactive tabs, chart axis ticks and decoration (never for text you must read).
- **Dark variants on tints** blue text #127EA6, green text #5F6A12, teal text #1F8F8E.

SEASON 2026 · TO SEP 27

Shape and space

- Panels radius 18–22, inputs 12, chips fully round, primary button 16 radius and 50 tall.
- Outlines 1.5px. Hairlines between rows 1px #F0F0F2 (or the group color at low opacity in Settings).
- Page padding 16; panel padding 14–16; 12px between panels. Tap targets at least 44px.
- No drop shadows except the selected segment in a segmented control.

Page title · 28 / 600, left-aligned

Hero number · 40–48 / weight 300

Stat number · 22–34 / 300

Section title · 15.5 / 600

Row · 14–15 / 400, value right in grey

Caps label · 12 / 700, +0.07em

The pieces every screen is built from

Tinted panel (one per page)

The most important thing on the page, e.g. Results top numbers, Volume season card, the Races "bests" card. Tint + outline in the same color.

Outlined, collapsible section

48px header row: title left, grey summary right, caret. Tap to fold. Open/closed is remembered per device. Outline color = the section's job (blue nutrition, green closet, black "on the ride", grey neutral).

Input section (Plan)

Outlined section with a small caps heading and its inputs, all open. On Plan the Ride section (duration + effort) is the tinted one, in the chosen effort color; Where & when, Stops, and Today & bike use grey outlines.

Timeline (Journal, races, ride order)

- upcoming / in progress = hollow dot
- past item = filled dot in its color
- e.g. Hard ride, caffeine moment

Delta pills

+14.3

-12.2

Green = better, red = worse (red text on a light red pill). Colors flip when the goal is "Less".

Header and navigation

- Header: big left-aligned page title (28/600) with an optional grey subtitle (sync status or ride date) and the account circle on the right. No centered logo bar.
- Bottom nav: 5 tabs, line icons with labels: Plan · Journal · Volume · Races · Settings. Active black, inactive #B5B5BA, no color.
- Footer text stays: "Planning tool, not medical advice · The science →".

Today's ride: sections, all open

Every input visible on one page in four stacked sections (option 1). Nothing hidden behind a tap.

- **Ride** (the tinted panel, in the chosen effort color): caps heading "RIDE"; Time | Distance segmented control; Time mode = hours + minutes; Distance mode = distance + avg speed with the time shown as an auto field; then the effort control Recovery / Steady / Hard with teal, blue and green dots.
- **Where & when** (grey outline): location field, "Use my location · or type a temperature", then Date · Start · Ends (auto).
- **Stops** (grey outline): one row per stop: mile (or time) with its estimated ride time and clock time, and Water / My baggies / Aid table chips; "+ Add a stop (up to 4)".
- **Today & bike** (grey outline): No gels · Caffeine · Fewest bottles chips; then "Bike" with a segmented control (Tri · 3 cages / Road · 2 cages).
- **Crunch the plan** full-width black button under the sections.
- **Rules** sections are panels (radius 18–22), 12px apart, headings in small caps (12/700, +0.07em). Only Ride is tinted. All fields always visible.

Results: prep checklist

The plan becomes a to-do list for ride morning.

- **Top numbers** (tinted in the effort color): "Steady · 4:30 · refill at 3:30", then bottles · gels · temperature (dew point) and g carbs/hr · g total · concentration; "Adjust this ride" button (existing Adjust panel, restyled).
- **Weather** small outlined card ABOVE the bottles, about the size of the Gels section: condition icon, temp, condition, "→ 54° by 12:30", feels / WBGT / band, one line of details (wind + gusts, humidity, dew, rain, UV) and "Changed your plan: fluid 28 → 24 oz/hr · sodium follows". No sky gradient.
- **Bottles** (was Mix): tick boxes per bottle with cage and full recipe; baggie rows for refills; header shows "2 of 4 done". Ticks are stored on the plan.
- **Gels** (was Pack): one tick row per gel type with count and timing; caffeine gel separate.
- **Closet** (was Wear): each clothing item from the closet with a tick box.
- **During the ride** (kept for now): timeline bar plus key moments with ride time and clock time.
- **Nutrition totals** open: carbs, kcal (carbs × 4), sodium, fluid, caffeine, ride time; per-hour line; black Copy button (text format on page 13).
- **Details** collapsed (the math). Then the Save to Journal bar.

5 / 14 · fred design spec v3 · 2026-09-28 · v2

Journal: timeline

Rides as a story on a thread; the check-in waiting is the one tinted item.

- **Order** Upcoming planned rides at the top as hollow dots, then past entries newest first.
- **Entry line** "MM/DD/YY HH:MM · H:MM · Name": date/time and duration bold, name grey (defaults to "{Effort} ride"). Time follows the phone's 12/24-hour setting.
- **Under it** one line of numbers (actual g/hr, sodium, temp or Strava match) and the how-it-went tags colored by meaning (good dark green, rough red, neutral ink).
- **Dot color** the ride's effort color; races black.
- **Check-in** the ride waiting for a check-in is tinted teal with a teal "How did it go?" button; tapping opens the check-in sheet (same C style: stepper rows for bottles finished in quarters, gels, extra food, ride time from Strava, the live "You took in..." line, then Energy / Stomach / Thirst / Clothes chips, notes, optional name).
- **Copy** each checked-in entry has Copy (actual intake sentence, page 13).
- **Folded section** "What fred noticed" (patterns) as a collapsible panel under the thread.

part 2 of 2

Plan

Journal

Volume

Races

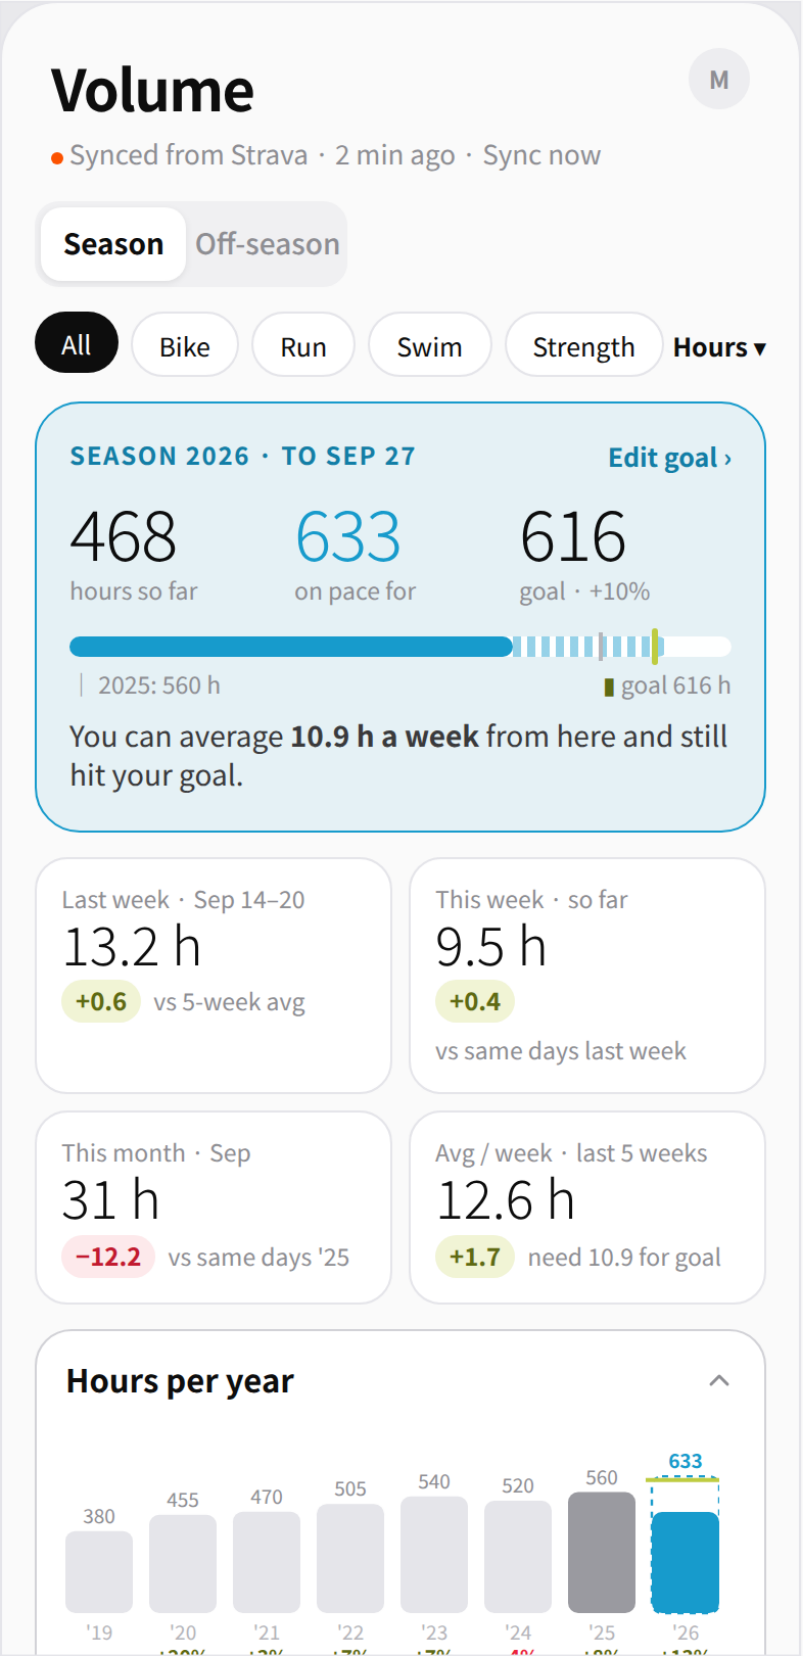

Settings

Volume: season card, tiles, charts

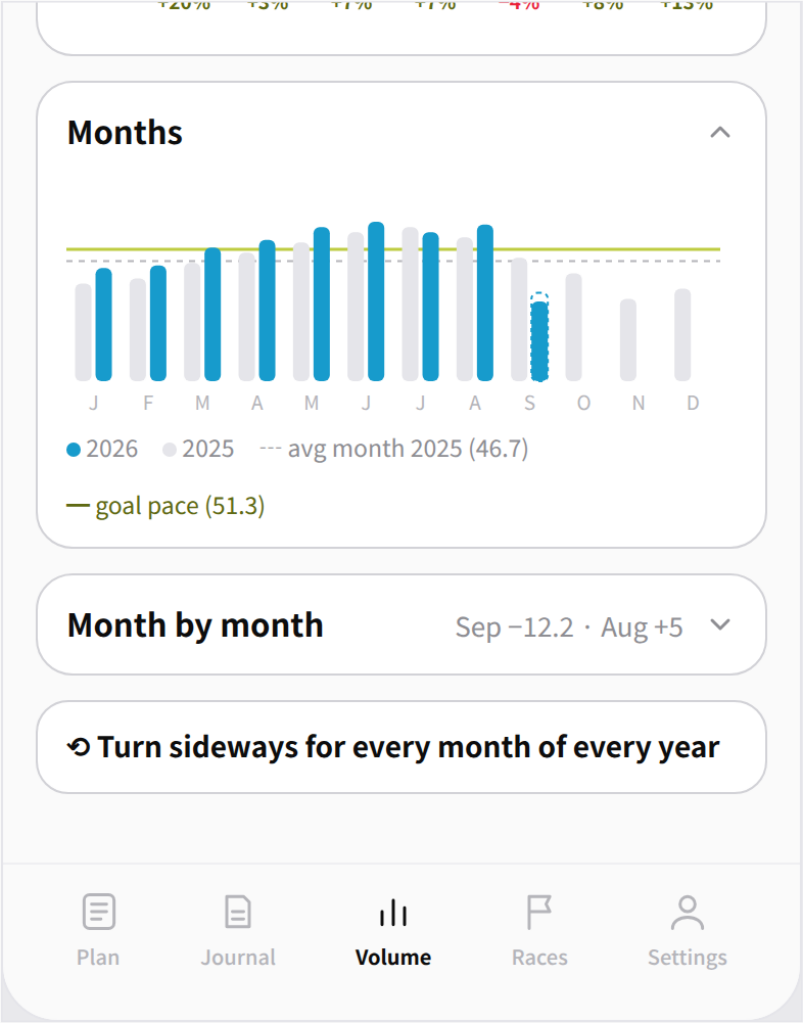

Layout 5 with the refined tiles.

- **Top sync line** ("Synced from Strava · 2 min ago · Sync now"), Season | Off-season control, sport chips (All · Bike · Run · Swim · Strength), Hours ☐ menu.
- **Season card** (tinted blue, the important one): hours so far · on pace for (blue) · goal, with the progress bar directly underneath (dashed on-pace extension, green goal tick, grey last-season tick, labels), then the permission line "You can average X h a week from here and still hit your goal."
- **Four tiles** Last week (vs 5-week avg), This week so far (vs the SAME days last week), This month (vs the same days last year), Avg / week over the last 5 weeks (vs the weekly need for the goal). Delta pills.
- **Charts** Hours per year (last season dark grey, this season blue with dashed on-pace and green goal line, % vs prior under each bar); Months (2026 blue vs 2025 grey, dashed avg-month line, green goal-pace line; in-progress month dashed).
- **Folded** Month by month list (both comparisons as pills) and the sideways link.
- **Off-season mode** keeps its content (week N of M, days fully off, permission line "You can go down to X h a week...", fitness fade vs Friel ~20%, next-season table, why off-seasons exist) restyled: the off-season card is the tinted panel (teal), everything else outlined.

Volume · final · part 1 of 2

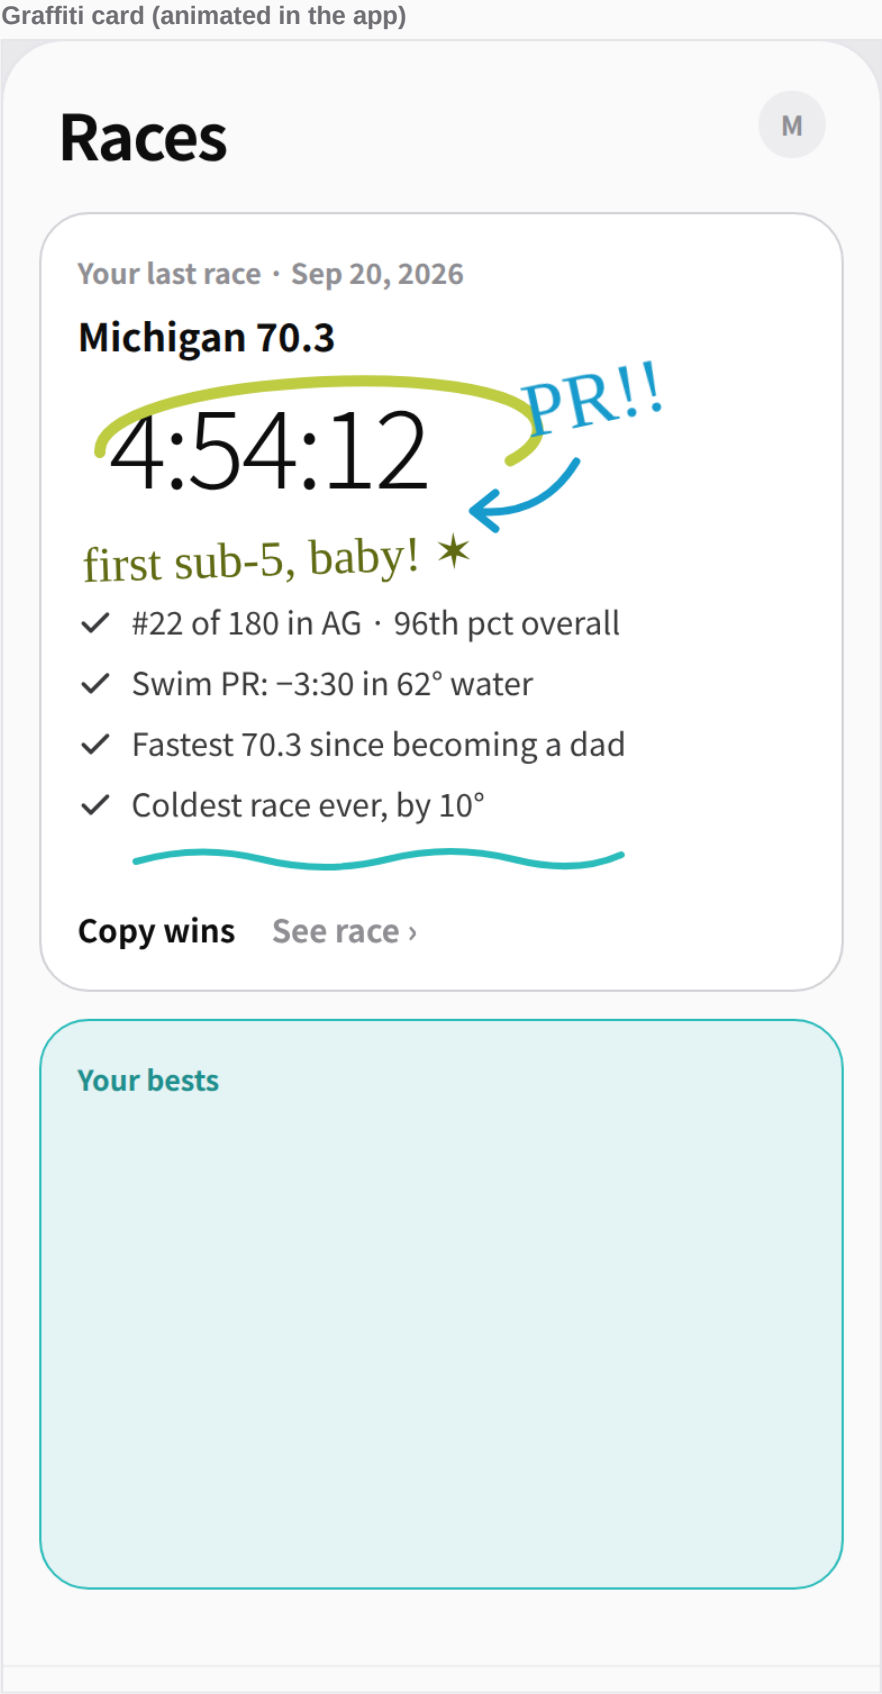

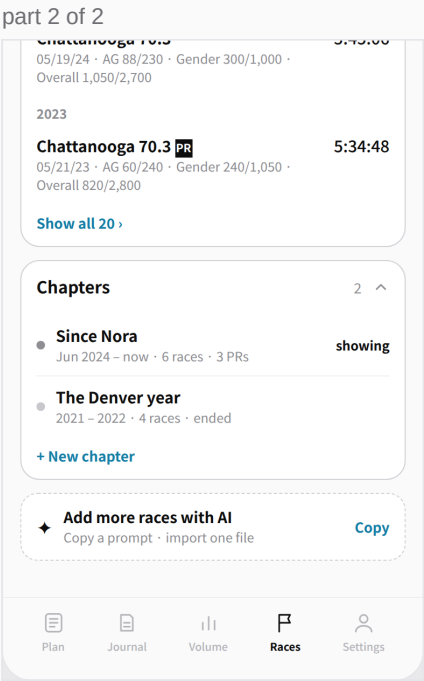

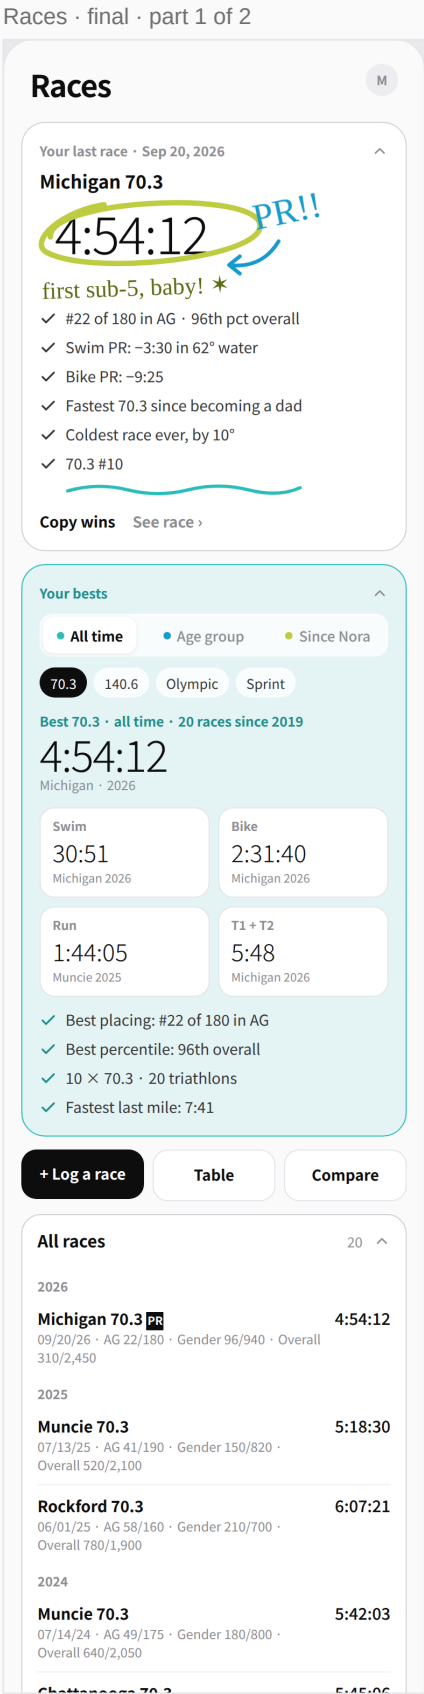

part 2 of 2

Races: last race, your bests, then the lists

Layout 1 with the graffiti celebration. Order is fixed: last race wins → bests → buttons → lists.

- **Last race card** (neutral grey outline): "Your last race · date", race name, the time circled in green marker with "PR!!" and an arrow, a handwritten note ("first sub-5, baby!"), every selected win with dark check marks, a teal squiggle, Copy wins / See race.
- **Graffiti rules** fonts Permanent Marker (scribbles) and Caveat Brush (note), self-hosted with their OFL licenses. The circle draws itself (1.4 s) and "PR!!" pops once, the first time the tab opens after a new race; afterwards they are static. Reduce Motion = static. No PR = no circle: a gentle note instead ("Finished. Race #10 of the season.").
- **Your bests** the ONLY colored card: tint + outline = teal (All time), blue (Age group), green (chapter). View switch with colored dots, distance chips, best time, 2×2 leg PRs in grey-outlined tiles, four good-things lines.
- **Buttons** + Log a race (black) · Table · Compare.
- **Lists** grey-outlined, collapsible: All races by year (name, PR badge in black, time; line 2 = date · AG · Gender · Overall), Chapters (+ New chapter), then the "Add more races with AI" card (dashed).

Logging a race (1 of 2)

Each card is tinted in its leg color: Overview/T1/T2/Finish/Nutrition/Feel grey, Swim teal, Bike blue, Run green. Progress dots on top, ← and "Next: ..." at the bottom.

- **Overview** race, date, start, place, distance chips, brand; "Weather fills in from the date and place".
- **Swim** distance, time, water temp, avg HR, wetsuit, "Anything off?" (Normal, Cancelled, Short, Long, Current).
- **Bike** distance, climbing, time, first half, second half AUTO, Avg W, NP, HR; the aero estimate section folds away.
- **Run** distance, climbing, time, halves (second AUTO), last 10K / 5K / mile, HR.
- **Everywhere** times typed as digits only, number keypad; no wins, PRs or comparisons anywhere while logging.

Settings: search + list, colored lines

Layout 3, no boxes. Lines in each group's color separate everything.

- **Top** "Search settings" box (filters rows live, matches labels and values) and "Recently changed" chips (last 3 edited settings, tap to jump).
- **Groups** Fueling (blue), Gear (green), You (teal), Account & data (black). Each group heading has a 2px line in its color; rows below are separated by 1px lines in the same color at low opacity.
- **Rows** label left, current value right in grey, chevron. Tapping opens that setting in a sheet (existing editors, restyled).
- **Fueling rows** Carbs per hour, Sweat rate, Sweat sodium, Drink mix, Gels, Sodium top-off, Carb top-off, Caffeine, All products.
- **Gear rows** each bike (cages · weight · tires), Add a bike, Closet.
- **You rows** Name for results, Birthday (with age group), Gender, Weight, Units, Volume goal, Counts toward volume.
- **Account & data** Account, Strava, Imported training, Backup, Privacy, then "Delete my account" in grey. Always last.
- **No panels** rows sit directly on the page; no tinted or white boxes on this screen.

Everything this build changes besides the look

These are the back-pocket items. Each must work exactly as described.

- **Plan** → **Journal** after Crunch a bar offers "Save to Journal" / "Not now". Save stores the plan as a planned entry (full snapshot), clears Plan, toast "We'll ask how it went after {end time}". Journal groups: Check in / Upcoming / Done; teal dot on the Journal tab while a check-in waits.
- **Check-in** bottles finished (quarters), gels, extra food, ride time (Strava match), live actual g/hr, sodium/hr, oz/hr; then feel chips, notes, optional name. Patterns and closet learning use ACTUAL intake only.
- **Digits-only time entry** every duration field formats from the right: 451 → 4:51, 3051 → 30:51, 30851 → 3:08:51; paste h:mm:ss works; >59 min/sec flagged red.
- **Auto second half** bike and run: any two of leg / first half / second half compute the third ("auto"); manual edit overrides; first half > leg flagged.
- **No wins while logging** remove every comparison from the log cards; all wins together on Ready, Freddy.
- **Placings order** AG → Gender → Overall everywhere (log card, detail, table, compare, wins, exports).
- **Nutrition only in its card** carbs/sodium removed from Bike; migrate; importer maps Carbs/hr there.
- **Off-season start on a date** "Season over?" offers Not yet / Start on a date... / Switch; scheduled start shows "Off-season starts {date}" with Change / Cancel and switches automatically.
- **Copy text (Results)** plain sentence with commas: "Planned fueling for my 4:30 steady ride on 9/26: 383 g carbs total (85 g per hour), 1,532 calories, bottles at 5.8% concentration, 3,160 mg sodium (702 mg per hour), 112 oz fluid (25 oz per hour), 8 gels, 100 mg caffeine at 2:30."
- **Copy text (Journal)** after check-in, the actual version: "I took in 79 g carbs per hour on my 4:18 steady ride on 9/26: 340 g carbs total, 1,360 calories, bottles at 5.8% concentration, 2,800 mg sodium (651 mg per hour), 98 oz fluid, 7 gels, 100 mg caffeine at 2:30."
- **Volume tiles** Last week, This week (vs same days last week), This month (vs same days last year), Avg / week over last 5 weeks.
- **Races** last-race card lists that race's selected wins (graffiti), bests card changes color with the view, lists below.
- **Settings** one flat searchable list with colored lines; Account always last.
- **Unchanged** all math, sync, Strava rules, importers, AI prompt cards, CdA, exports; this build restyles and adds the behaviors above.

Accessibility, motion, and done-means-done

- **Contrast** WCAG AA everywhere: 4.5:1 for text (use #6E6E73 for secondary text), 3:1 for large text, outlines of inputs and icons. The existing automated contrast test covers every screen in this spec.
- **Larger text** html uses -apple-system-body; all sizes in rem; big numbers with clamp(); grids reflow; nothing clips at 320/375/390/430 px × 100/150/200% text.
- **Motion** only the graffiti draw/pop (once per new race), the Results/Journal toasts, and caret rotation. prefers-reduced-motion disables all of it.
- **Light mode only** no dark theme in this build.
- **Screens** screenshot every page at 390 px in the test run and compare against this document.
