fred round

Oct 15, 2026

QUEUE ITEMS IN THIS ROUND

87. **Weather card: a living sky** · eight animated skies, animated icon, gauge entrance, readable text p.2–3
88. **Volume: colour, and motion on first view** · gradient cards, % vs year before, timings, asymmetric count-ups p.4–5
89. **Volume: tap a tile, it grows in place** p.6
90. **Journal: motion** · stripes sweep, scroll fold, + sheet, push p.7
91. **Journal: your own header photo** p.8
92. **Deficit and weight** · plan on Volume, weigh-ins in the Journal, weight on the year chart p.9–10
93. **Ride ticket: tap the number, spin the wheel** · Time | Distance, centred wheel, haptic ticks p.11

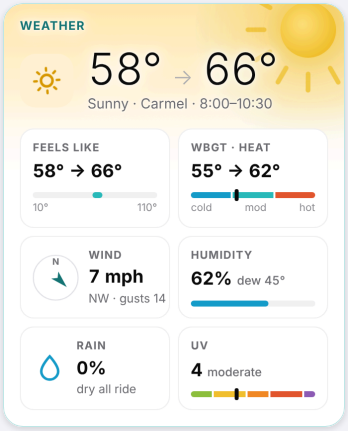

WORKING CODE

docs/design/fred-motion-3.html · tabs Weather · Volume · Journal. Every timing and curve in items 87–90 is live there; copy its CSS and feel.
docs/design/fred-duration-wheel.html · item 93, open it on an iPhone (Buzz, A · Scroll, B · Drag).
Canvas **fred design 2** › rows “Deficit & weight” and “Journal · your photo up top” (items 91–92).

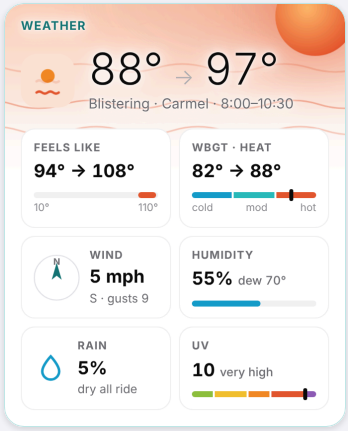

Numbers in the pictures are examples. fred's tokens and the Reduce Motion rules from item 85 apply to everything here.

2 Weather card: a living sky

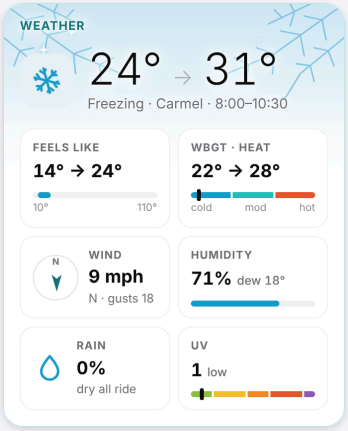

ITEM 87 · THE EIGHT SKIES (LIGHT MODE)

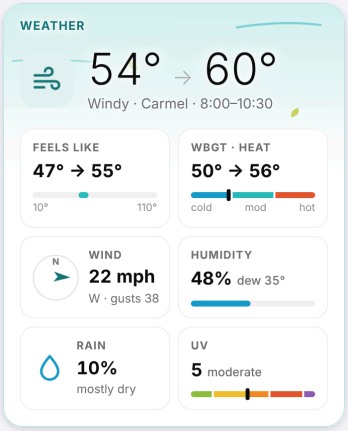

Sun

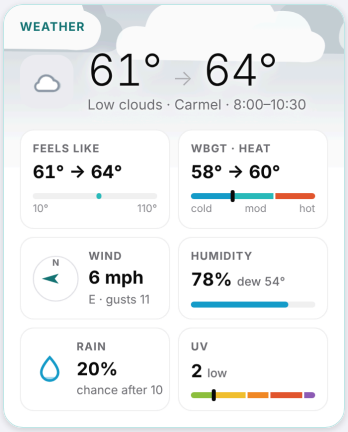

Heat

Freezing

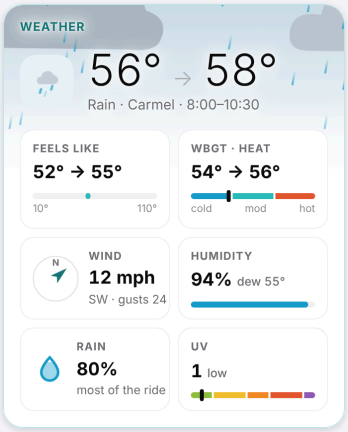

Wind

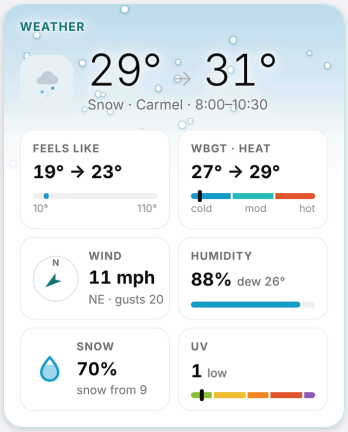

Low clouds

Fog

Rain

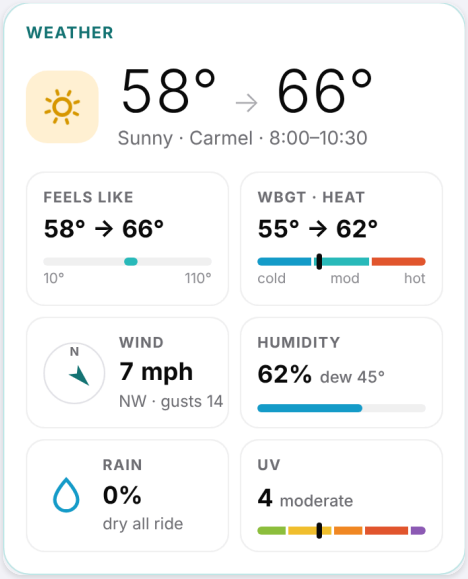

Snow

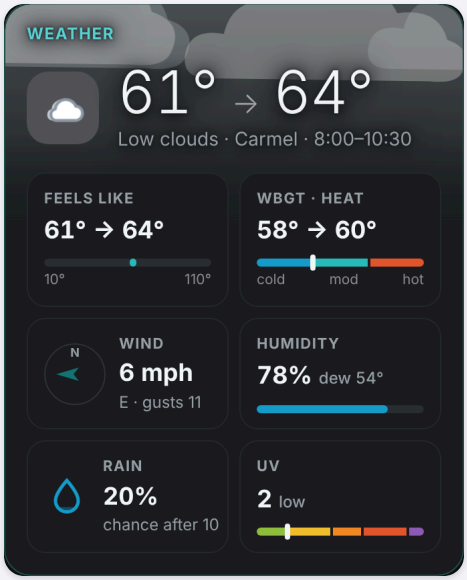

Frozen frames of looping motion: rays turn, frost draws in, streaks zip, clouds drift, fog drifts over the whole card, drops and flakes fall. The gauge tiles keep their white panel.

3 Weather card: icon, dark mode, entrance

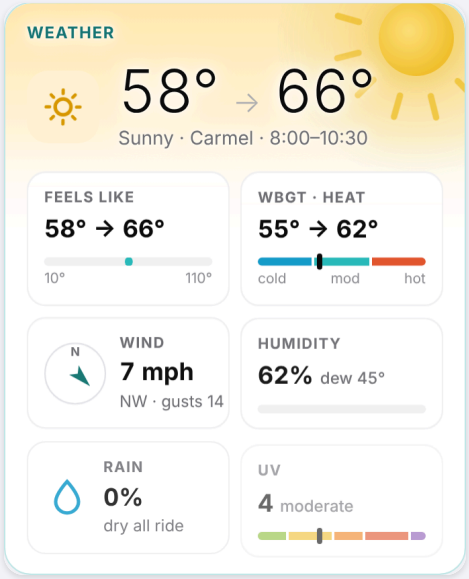

ITEM 87

Icon only (no sky) · the icon still moves

Dark mode · clouds dimmed · text feathered

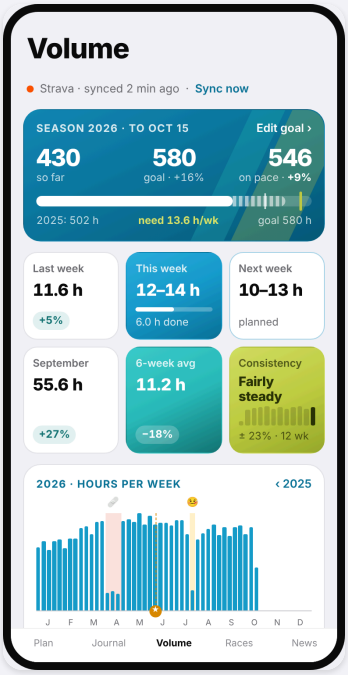

Entrance, 0.4 s in · tiles rising, bars growing

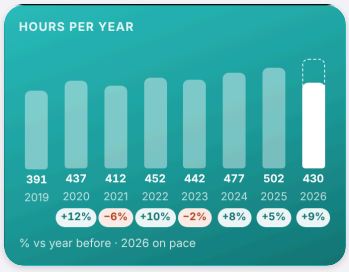

ORDER	SKY	WHEN (FIRST MATCH WINS)
1	Rain	rain, drizzle or thunderstorm in the window
2	Snow	snow
3	Fog	fog
4	Heat	feels-like max ≥ 90°F, or WBGT max ≥ the hot line (Settings)
5	Freezing	feels-like min ≤ 32°F
6	Wind	average wind ≥ 18 mph, or any gust ≥ 30 mph
7	Low clouds	cloudy / overcast
8	Sun	clear or partly cloudy, daytime
9	none	clear at night: no sky, static moon icon

4 Volume: colour

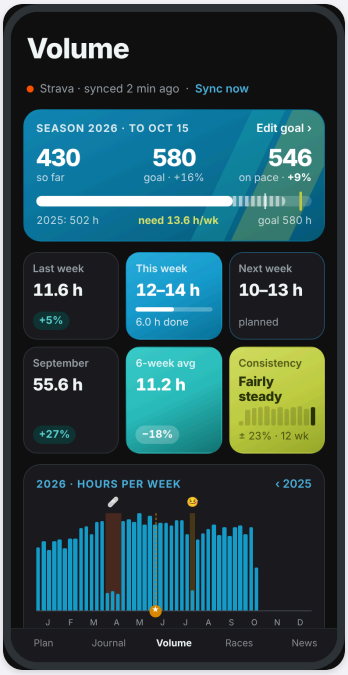

ITEM 88 · LOOK

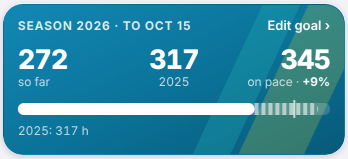

Season card deep blue + stripes · three coloured tiles

Hours per year: teal, white bars, % vs year before

Dark mode

Switch to Bike: numbers roll, bars slide

Colour is occasional: Season card (deep blue), This week (blue), 6-week avg (teal), Consistency (green), Hours per year (teal). Everything else stays a white box.

5 Volume: motion on first view

ITEM 88 · TIMINGS (MS FROM THE MOMENT A BOX IS IN VIEW)

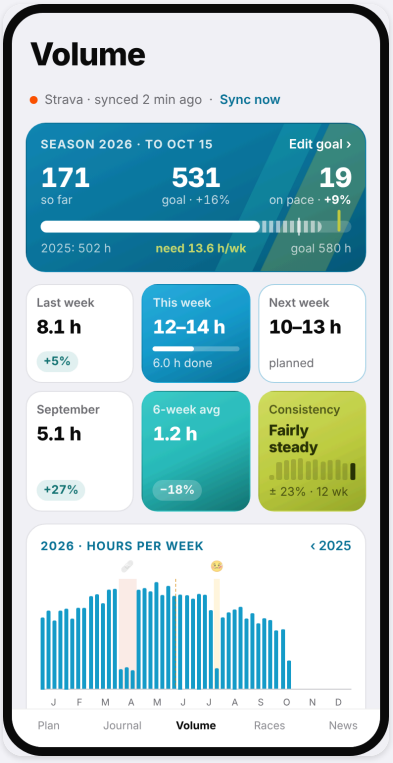

BOX	PIECE	DELAY	TAKES
Every box	fade in + rise 6 px	0	200
Season card	bar fills (scaleX)	60	450
	on-pace dashes draw	360	200
	2025 tick + labels fade	300	200
	goal tick drops 6 px	400	200
	stripes slide in	0 / 60	400
Six tiles	tile i rises	i × 25	200
	This week bar fills	150	350
	Consistency bars (j = 0–11)	150 + j × 15	180
	pills fade	150 + i × 25	200
Hours per week	bars (i = week)	40 + i × 6	300
	injury / sick bands, icons	300	200
	life-event star drops 6 px	380	200
Hours per year	bars (i = season)	40 + i × 30	320
	on-pace dashes draw up	380	200
	values	150 + i × 30	200
	% pills	200 + i × 30	200
Months	grey last-season bars	40 + i × 12	280
	blue this-season bars	140 + i × 15	300
	in-progress dashes	400	200
	avg line, goal line draw	380 / 440	260
Month by month	rows rise 4 px	40 + i × 20	200
Every month grid	cells fade + scale .85→1	40 + (row+col) × 12	200

COUNT-UP	DELAY	TAKES
Goal	0	650
So far	120	950
On pace	280	1250
Last week	60	750
6-week avg	140	1300
The month (September)	220	950
This season total (per year)	260	1100

Curve: cubic-bezier(.45, .05, .15, 1) for every count-up; every frame, from 0. Each number has its own timing, so they land one after another. No blur.

Entrance: ease-out only (var(--ease-out)), no springs. Boxes arriving together start 30 ms apart.

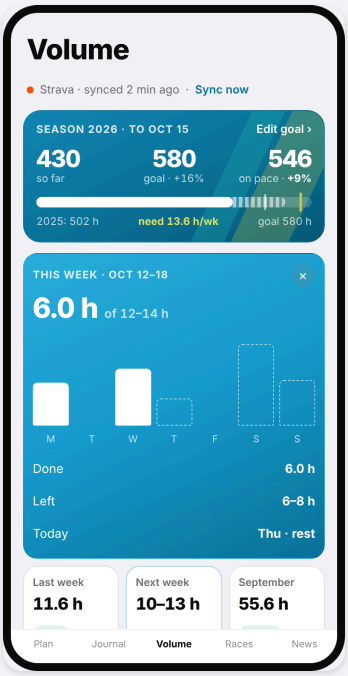

Once per app open: each box plays the first time it scrolls into view. Coming back to Volume shows everything still. A new app open = a cold start, or back after 30+ minutes in the background.

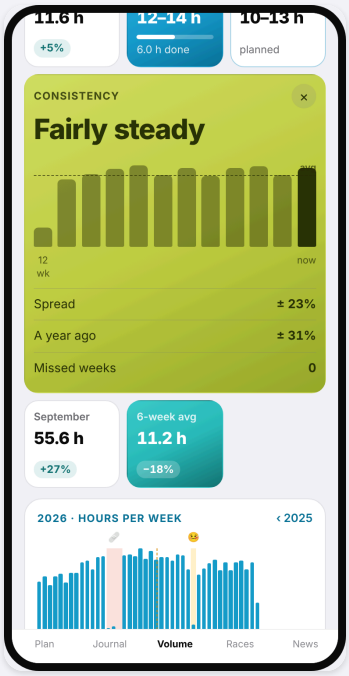

0.26 s after opening Volume

6 Volume: tap a tile, it grows in place

ITEM 89

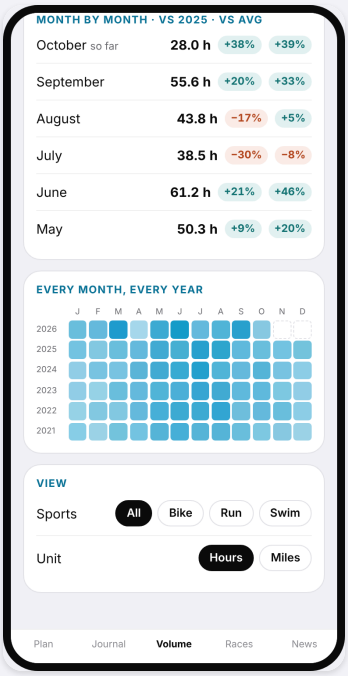

This week, open

Consistency, open

Lower boxes

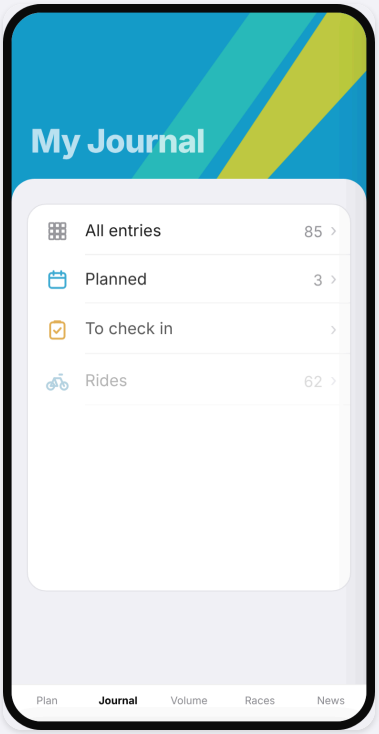

Month by month, grid, View

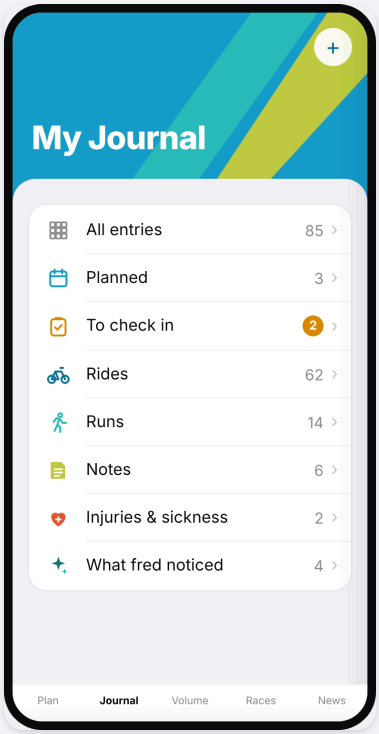

The tile grows to three tiles wide at the start of its row; the rest flow after it (FLIP, 440 ms ease-out). Big content fades in at 260 ms, its bars grow 45 ms apart. Tap again or × to close.

7 Journal: motion

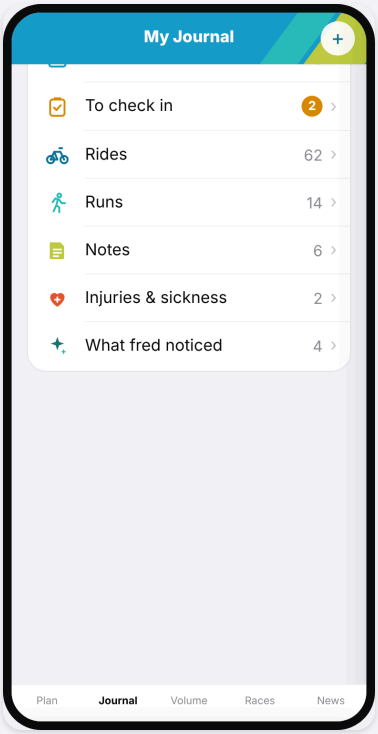

ITEM 90

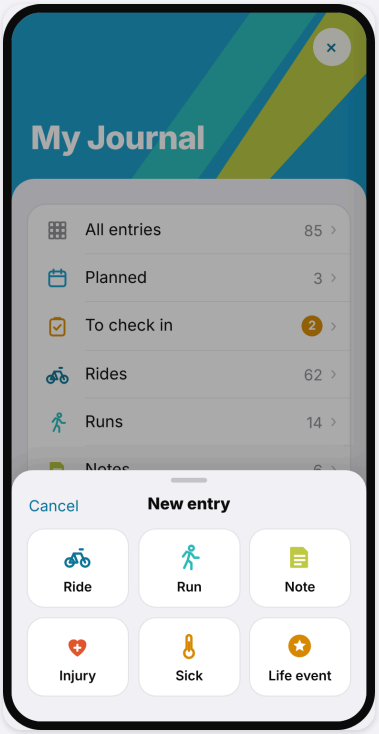

Stripes sweep in (0.33 s)

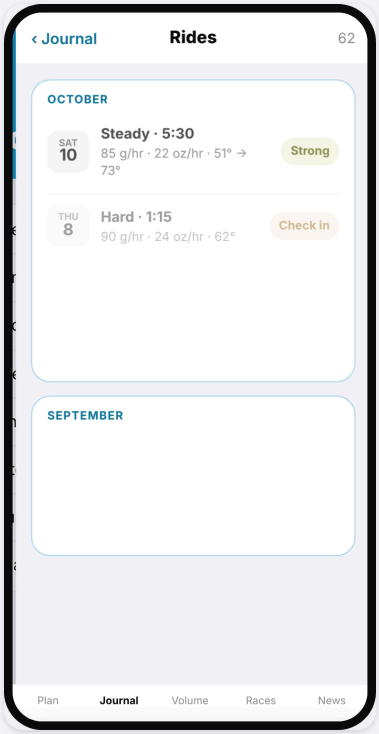

Rows rise, badge pops

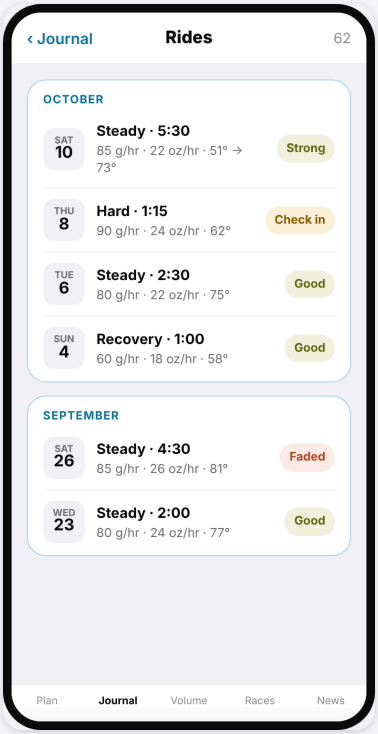

Scrolled: header folds to a bar

+ turns ×, entry tiles pop

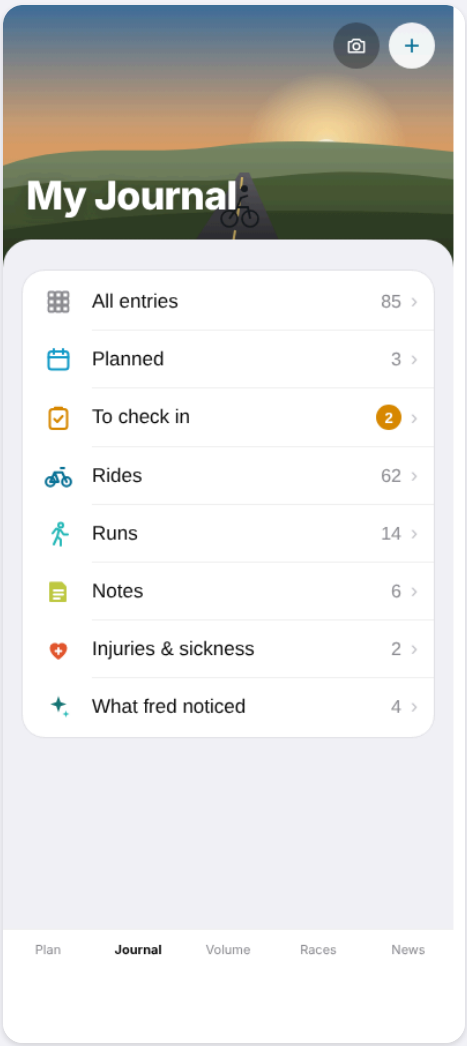

Opening Rides: slides in from the right

Rows rise

8 Journal: your own header photo

ITEM 91

Photo

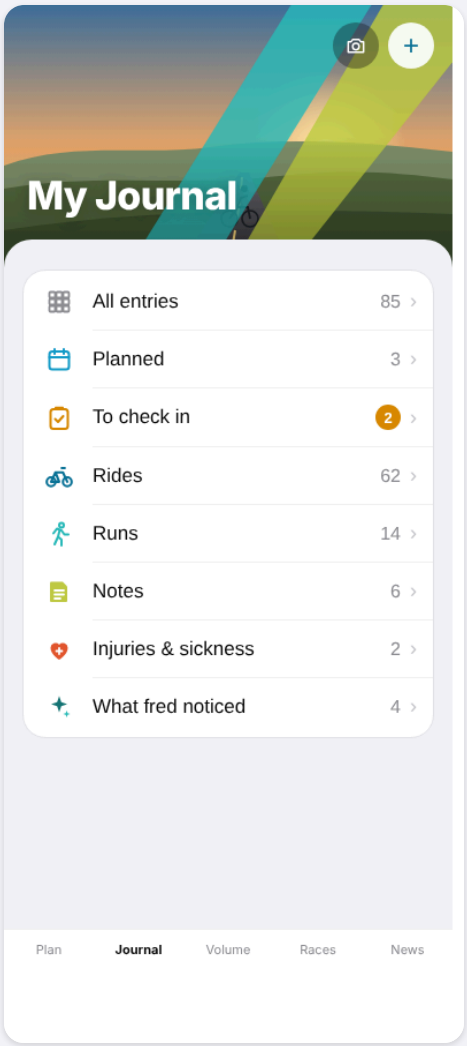

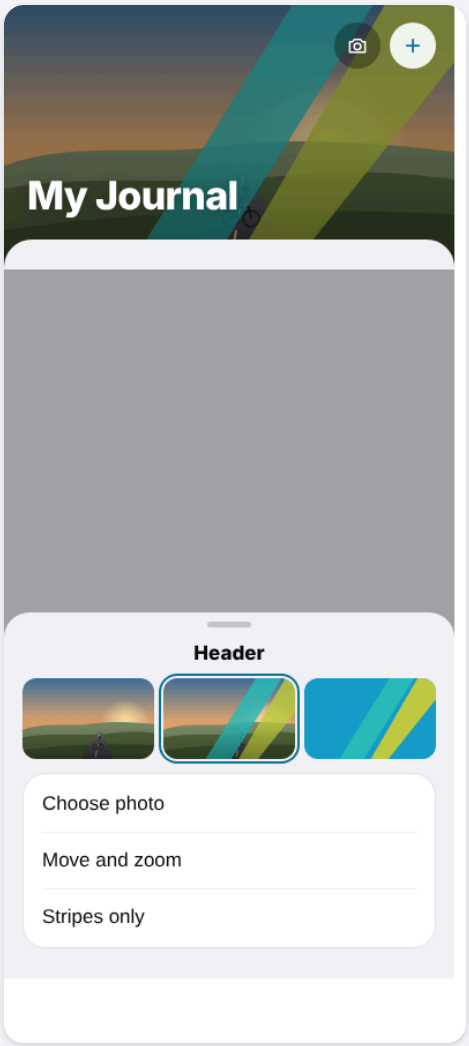

Photo + stripes

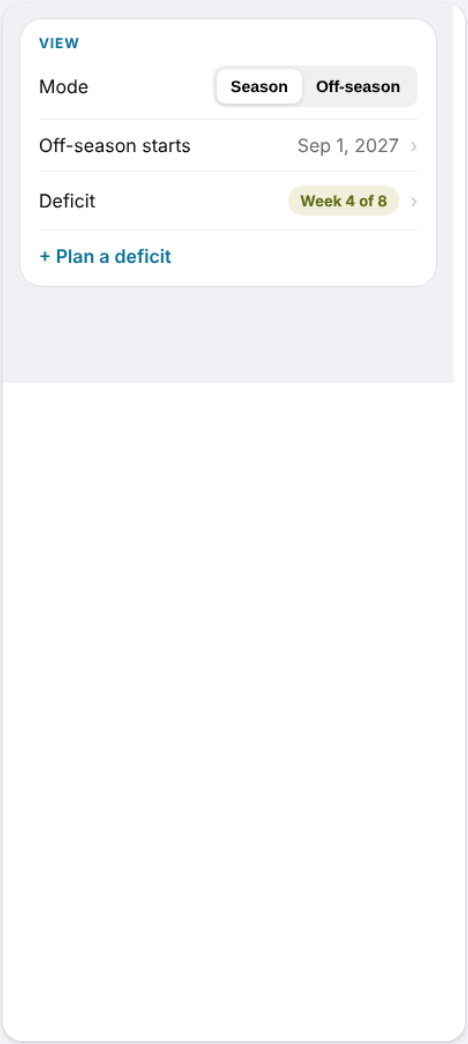

Camera button → Header sheet (no Take photo)

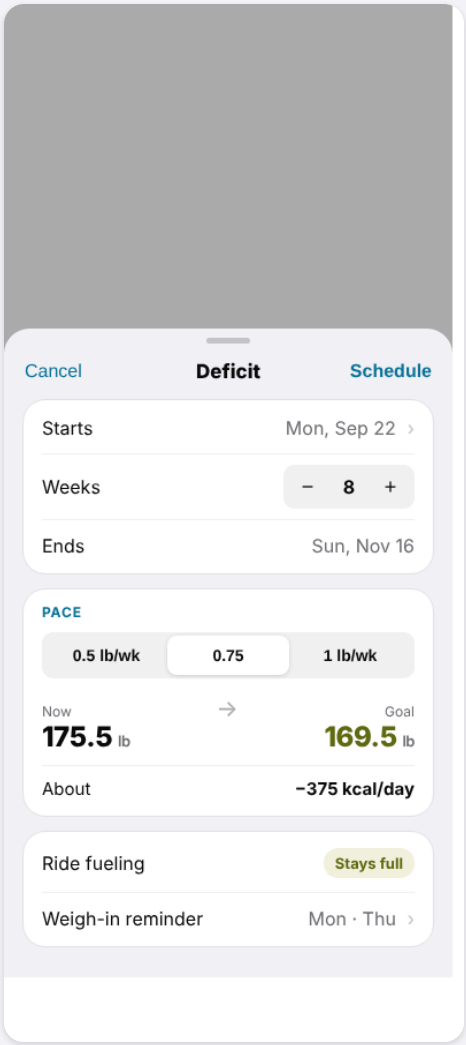

The person picks the style in the sheet: Photo, Photo + stripes, or Stripes (today's header, the default). Choose photo · Move and zoom · Stripes only. The photo here is a drawn stand-in.

9 Deficit and weight · Volume

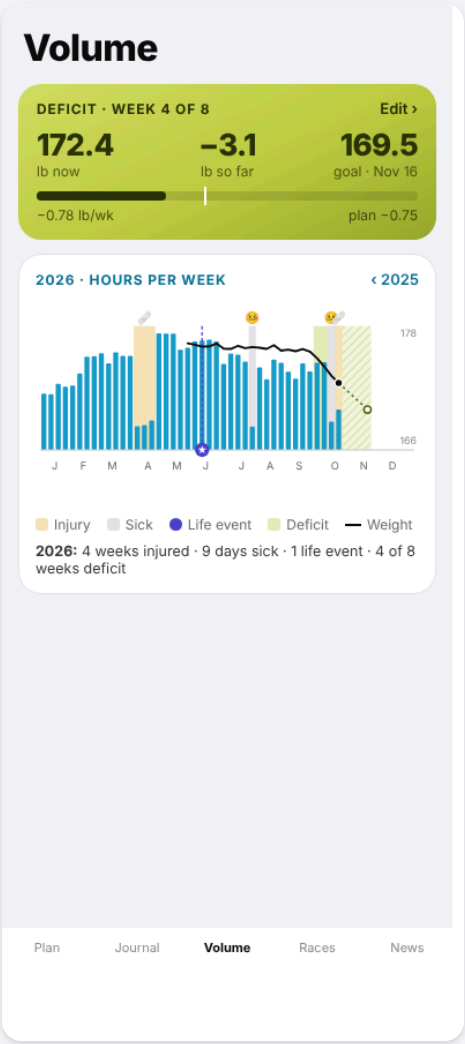

ITEM 92

View box: Deficit row / + Plan a deficit

Plan a deficit sheet

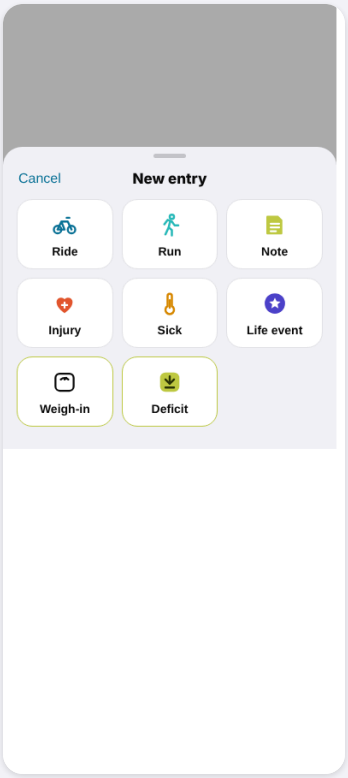

Deficit card + weight on the year chart

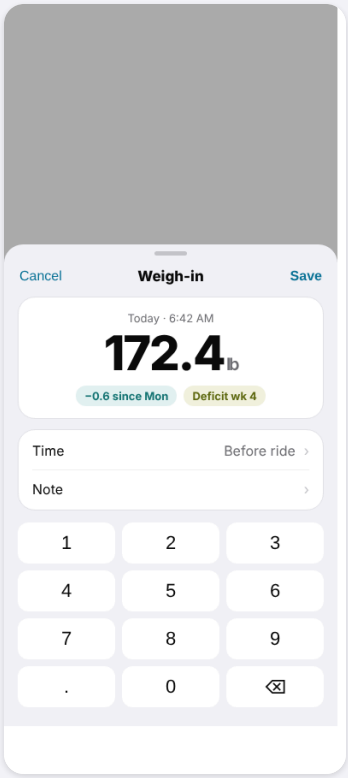

Ride fueling never changes in a deficit. On the year chart: deficit band (solid = done, striped = planned), black weight line on its own scale, dotted green line to the goal, injury / sick / life events on top.

10 Deficit and weight · Journal

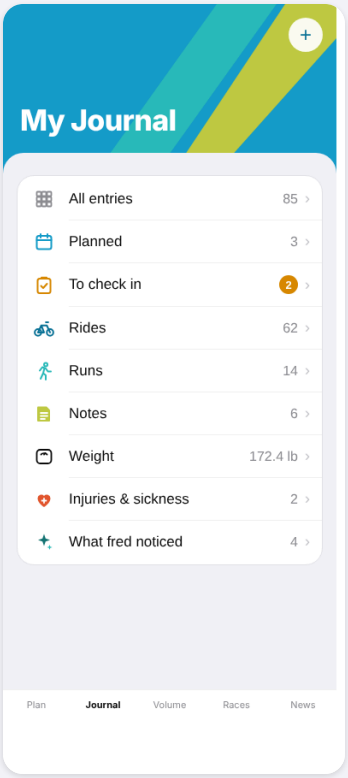

ITEM 92

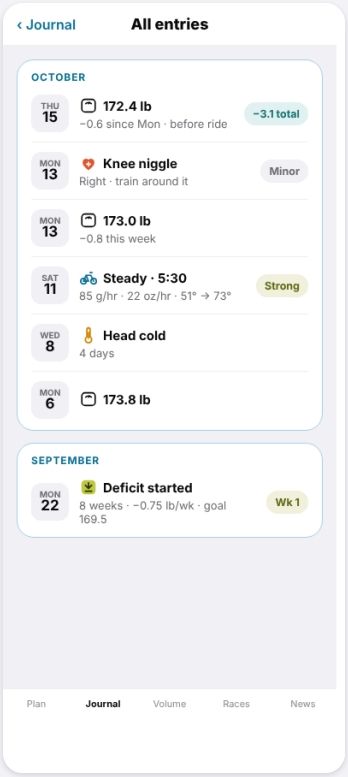

+ adds Weigh-in and Deficit

Weigh-in sheet

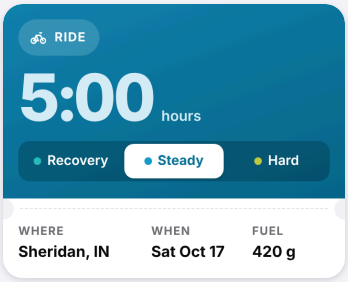

Weight row

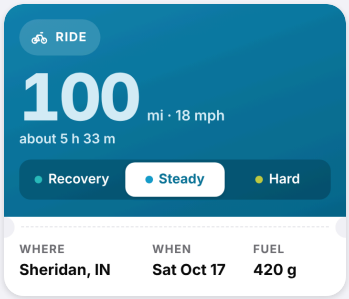

All entries

11 Ride ticket: tap the number, spin the wheel

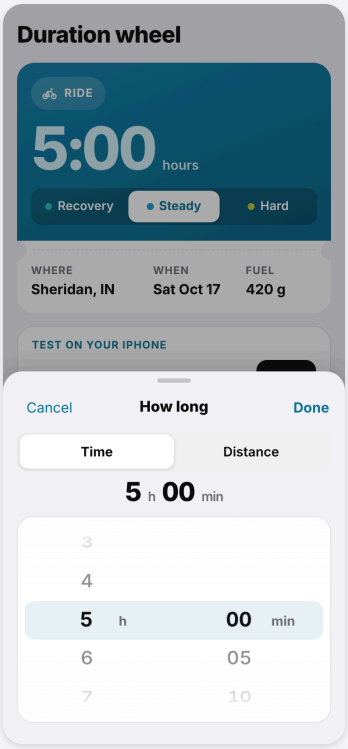

ITEM 93

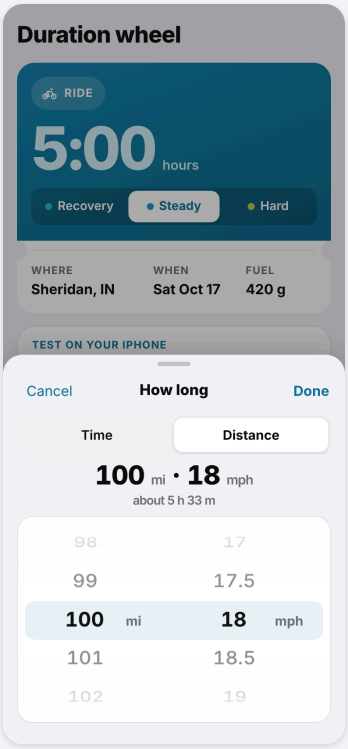

No Duration button · slight gradient · tap the number

Distance on the ticket

How long · Time

How long · Distance

One fixed band across both wheels; the numbers roll through it like a drum. The readout updates as each number crosses the band, with a light haptic tick each step (Android: vibrate; iPhone: the hidden switch trick).
